MERN stack developer with 2 years + of experience in building scalable web applications. Skilled in React.js, Node.js, Express.js, and MongoDB. Focused on writing clean, efficient code and optimizing performance. Strong in responsive design, cross-browser compatibility, and teamwork to deliver seamless user experiences

EDUCATION

BS Software Engineering COMSATS University Islamabad, Abbottabad Campus	2020 - 2024
FSC Computer Science ISLAMIA College Peshawar	2017 - 2019

PROFESSIONAL EXPERIENCE

DevEntia Tech Pvt Ltd (Full Stack) - Islamabad, Pakistan	August 2024 - Present
<ul style="list-style-type: none">Contributed across multiple projects, actively handling both frontend and backend tasks.Focused on designing UI screens, creating and testing REST APIs in production-grade systems.Transformed Figma and Canva designs into fully responsive, pixel-perfect web pagesPrimarily focused on designing UI screens and integrating REST APIs in production-grade systems.Technologies Used: React.js, Next.js, TailwindCSSTools Used: VS Code, Figma, GitHub	
INFOTEX Pvt Ltd – Islamabad, Pakistan (MERN Stack Internee)	March 2024 – Aug 2024
<ul style="list-style-type: none">Worked as a MERN Stack Intern contributing to internal tooling and component integration.Built reusable UI components using React js and Tailwind CSS.Assisted in consuming APIs and debugging front-end issues.Technologies Used: React.js, Next.js, TailwindCSSTools Used: VS Code, Figma, GitHub	

PROJECTS

1. **Project Aneuro:**
Aneuro is a project designed to help businesses and creators connect with their target audience more effectively. The platform engages users through interactive quizzes that analyze their preferences, behaviors, and thought patterns. Based on the results, Aneuro identifies the user's "brain type" and provides tailored recommendations. These recommendations include the most effective marketing tools, email strategies, prompts, funnels, and other engagement tactics that resonate with each brain type. In other words, Aneuro bridges neuroscience-inspired audience insights with practical marketing strategies, making it easier for businesses to craft campaigns that truly connect with their audience on a psychological level.

Key Features:

- Stripe Integration for secure payments
- Real-time updates via WebSockets
- Social media authentication with Passport
- Role-based dynamic dashboards

2. Web Bank App

A collaborative platform for banks and financial advisors to manage leads and teams efficiently.

Focused on streamlining lead management, team collaboration, and communication for banking professionals.

Key Features

- Lead creation, assignment, and tracking with real-time updates.
- Team and member management with multi-role authentication and authorization.
- Dashboard analytics, document management, chat functionality, and notifications.
- Integrated advanced search for leads and users to streamline workflow.

3. Social Pro– AI-Powered Social Media Content Automation Platform

An all-in-one AI-driven solution for streamlining social media content creation, scheduling, and publishing.

- Integrated **lattice-based cryptography concepts** to enhance data protection and ensure post-quantum resilience.
- Built a full-featured web app combining GPT-powered content generation with media asset management.
- Enabled multi-platform post scheduling from a unified dashboard, simplifying content planning for weeks at a time.
- Designed for use by individuals, brands, and agencies to enhance productivity and reduce manual workload.
- Integrated responsive UI and intuitive workflows to manage posts, media, and scheduling with ease
- Focused on seamless user experience, performance, and scalable backend architecture using the MERN stack.

4. Falkie – Full Stack Company Management System (Web/Mobile)

A Comprehensive platform for managing projects, clients, employees, and team communication.

- Developed web and mobile applications to streamline employee, project, and client management.
- Admins can add and manage employees, managers, projects, and client details through a secure dashboard.
- Enabled real-time chat functionality between clients, managers, and admins for seamless communication.
- Designed intuitive user interfaces with role-based access and navigation.
- Implemented secure data handling and responsive layouts for both desktop and mobile experiences.
- Built using MERN stack and integrated backend features for scalable management operations

5. Zaika – Food Recipes Platform (Final Year Project)

Developed a community-driven recipe platform allowing users to share, rate, and review dishes.

Integrated meal-planning tools to optimize grocery management and reduce food waste. Enabled users to sell ingredients through an integrated e-commerce feature.

SKILLS

• Front-End:

Skilled in JavaScript (JS), TypeScript (TSX), React.js, Next.js HTML, CSS, Bootstrap, Tailwind CSS, ShadCn, and Redux Toolkit for building responsive, user-friendly UIs.

• Back-End:

Experienced in Node.js, Express.js, and MongoDB for creating scalable, secure RESTful APIs.

- **MongoDB:**
Strong in schema design, indexing, aggregation pipelines, and performance tuning.
- **DevOps & Deployment:**
Docker, AWS EC2, AWS S3, Git, Vercel, Render, CI/CD workflows
- **Real-Time Apps:**
Proficient with Socket.IO for implementing live chat, notifications, and updates.
- **Optimization:**
Focused on performance, scalability, and clean architecture using lazy loading, memoization, caching, and code splitting.
- **Debugging & Problem-Solving:**
Effective at issue resolution through logical troubleshooting and tools.
- **Agile Workflow:**
Experienced in Agile teams, contributing to feature planning, development, and iterative delivery.
- **State Management:**
Solid experience with Redux Toolkit and RTK Query for managing complex app states.
- **Third-Party Integration:**
Integrated Stripe, Google Drive, Google Analytics, Cloudinary, Twilio, S3 Bucket , and more.

CERTIFICATIONS

- JavaScript Basics – University of California, Davis (Coursera).
- Project Management – University of California, Irvine (Coursera).
- Usable Security – University of Maryland, College Park (Coursera)
- React Native – Meta (Coursera).
